

Acer Aspire 5315 Replacement Mounting

Written By: Carlos Ibañez

Step 1 — Riding the keyboard

- To mount the keyboard, we have to put the key and press it until a click

Step 2 — Riding network card

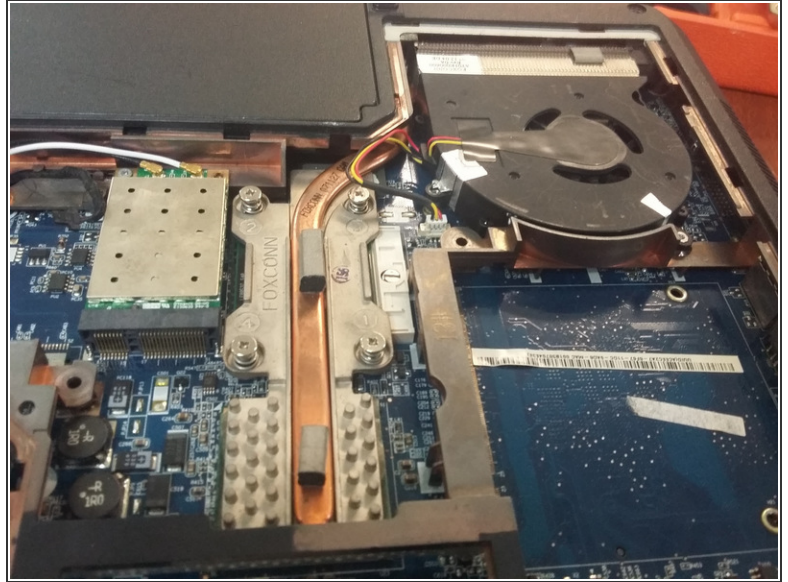

- Mounting card network, we have put in diagonal if you can not break.
- When it is placed just need to adjust the screw.
- To connect the two wires have to put on their sites and press it until a click.

Step 3 — Riding processor

- To mount the processor what we have to do is put it straight, but the pins can break and no longer serve.
- When it is well placed just have to adjust the screw until it is fixed.

Step 4 — Mount sink

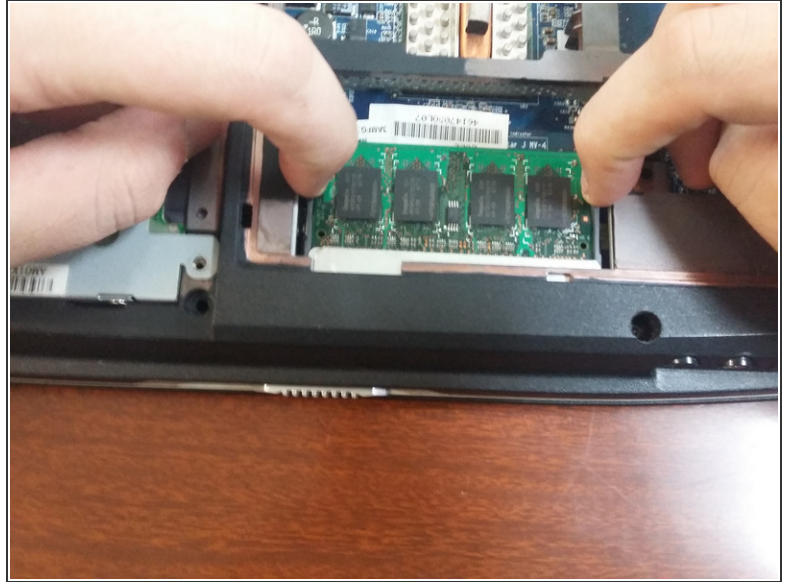

- To mount the heatsink must be careful to place it well as it could overheat if the processor and it would hurt.
- Once we are well placed four screws to fix it.
- Before, put the fan heatsink.

Step 5 — Assemble the fan

- When it is cleaned again put the four screws that do not open.
- Then we put in place the motherboard and look.
- Let us not forget to connect the cable.

Step 6 — Put RAM

- To put the ram must be careful also be broken as the network card
- We have put the diagonal so it does not break.

Para reensamblar tu dispositivo, sigue estas instrucciones en orden inverso.
